

Nameserver

How can I create a TXT record?

To create a TXT record, you have to log in to the customer area first with your personal userdata.

1. Click on the menu item "Nameserver".
2. Click on the "eye" symbol next to the respective domain name.
3. Add a new line.
4. Choose the "TXT" type from the drop-down menu.
5. Enter the TXT record into the field "value".
6. Save the entries.
