

Nameserver

How can change from external Nameservers to INWX Nameservers?

Of course you may use our Nameservers. Please follow the subsequent steps:

1. Log in to the customer area at www.inwx.com
2. Choose the menu item "Domain" and then "Domain List".
3. Choose "Update" next to the domain name from the drop-down menu.
4. Click on the tab "Nameserver" in the shopping cart.
5. Remove the check mark for "type in nameservers manually".
6. Choose one of our Nameserver-Sets.
7. Confirm the changes by clicking "Execute order".

Afterwards our Nameservers will become active at the Nameservers of the registry. You can change settings in our Nameservers under "Nameserver". It may take multiple hours until all changes have successfully been completed.
