

Nameserver

How do I set up virtual name servers?

Virtual name servers are our name servers under your domain, e.g. ns1.yourdomain.de, ns2.yourdomain.de and ns3.yourdomain.de.

Perform the following steps to set up virtual name servers:

1. In the customer area click in the left sidemenu on the item "Nameserver".
2. Select the "Manage NS Sets" tab.
3. Click "Add NS Set".
4. Select "Virtual name server" as the type.
5. Enter the desired virtual name server.
