

Transfer

Where can I get the AUTHCode for my .BE domain?

AUTHCodes for moving a .BE domain to another provider, can not be acquired in the customer area. The Codes can be requested with the new registrar and the registry.

Address the new provider directly or go to <https://www.dns.be>. There you should do a whois Lookup to check for the domain name. After performing a Lookup, you can request a Transfer Code. The AUTHCode for the transfer will be send to the e-mail in the whois data.

Should this address be out of date, please change the e-mail to in our customer area under the menu item "Domain Contacts".

Unique solution ID: #1229
