

# Transfer

## How can I transfer a .RO domain to you?

To transfer an .RO domain, an AUTHCode is necessary. The transfer will proceed in real-time, if the AUTHCode is correct.

To receive the AUTHCode, the domain owner has to do the following steps:

1. Go to: <https://rotld.ro/domadmin/>
2. Click on the menu item "Domains Administration" → "On-line".
3. Log in with your domain name and password. (The password can be requested with "Password reset?")
4. Click at "Authorization Key".
5. Under point 2. "Acquiring Authorization Key for domain transfer" you can request the one-time AUTHCode.

You can initiate the transfer subsequently in your customer area. Information to initiate the transfer may be found here:
